DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lindsey 3,242,133 or Szabo 3,919,359.

3. Lindsey discloses dibutylmercaptosuccinate in Table I. Szabo teaches dimethylmercaptosuccinate in Example 5 and diethylmercaptosuccinate in Example 7.

Applicants' claim is not novel.

4. Claims 1 and 23-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Henkel KgaA DE 32 47 736.

5. Henkel reveals applicants' thiol compound in claims 8 and 9 and applicants stabilized halogen containing polymer in claims 1, 3 and 4. Epoxidized soybean oil can be found on page 12, lines 19-20 and page 23, line 12. Appropriate alcohols are listed on page 7, lines 17-21. The presence of metallic stabilizers in claims 2 and 5 does not negate the fact that a metal free stabilization system is claimed in claims 1, 3 and 4. The reference claims two systems of stabilization, with and without metallic stabilizers, just like applicants claim their system with and without epoxidized soybean oil. The examiner knows no judicial decision, which would restrict a reference to one inventive composition. Applicants' claims are not novel.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1 and 23-40 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,762,231.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent encompass that of the instant application.
